

# Measuring to Determine Sizes

## Waist

Measure around the smallest part of the waistline.

## Hip/Thigh Area

Stand with both feet together and measure around the fullest part of the hip/thigh area, about 9 to 10 inches below the natural waistline.

## Biceps

Measure around the arm at the fullest part of the biceps.

## Bust & Chest

Measure around the fullest part of the bust/chest area while wearing usual undergarments.

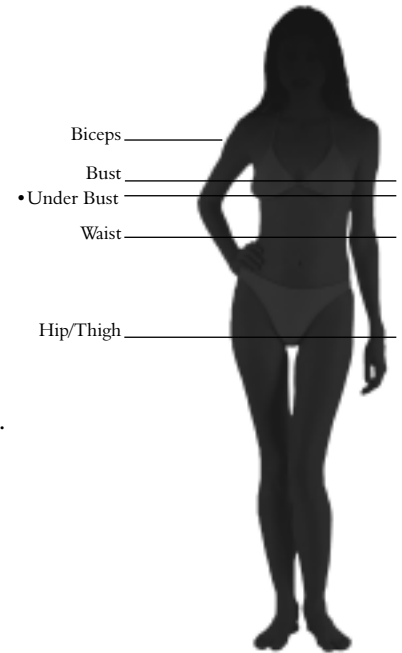

### •Under Bust

Measure around the chest circumference directly under the breast.

### •Bra Measurements

Before surgery, measure around the chest circumference, directly beneath the breast.

This will be the patient's bra size. Because the Design Veronique® bra is uniquely designed to contour to breast size after surgery, no cup size is required.

Hot water washing and/or drying with an electric or gas dryer may ruin the garment. To remove blood stains, soak the garment in a solution of 1/4 cup peroxide with 2-3 gallons cool water for 15 minutes, then hand-wash and line-dry. Repeat if necessary. Caution: Do not soak garment in solution longer than 15 minutes.
